

Nazar Yavnyy

nazar.yavnyy@pm.me <https://nazaryy.dev>

I am a Javascript Developer that focuses on front end tools such as React and Typescript. I have a high bar for the quality of code and quality of user experience. My area of expertise is React ecosystem, but I also have experience in backend software development.

SKILLS

WEB DEVELOPMENT Javascript / Typescript, React.js / Next.js, Node.js, HTML, CSS

MOBILE DEVELOPMENT React Native / Expo

EXPERIENCE

Lead frontend software engineer at *FutureLog*

March 2023 - Present

I led a team of five frontend developers in updating the technology stack of a major project, bringing it in line with industry standards.

- Typescript
- React.js / Next.js

Fullstack software engineer at *Techery*

December 2022 - March 2023

Worked on a highly scalable e-commerce product with a lot of 3rd party integrations.

- Typescript
- React.js / Next.js
- NestJS

Senior frontend software engineer at *Agena Tech*

October 2021 - November 2022

Designed architecture and led a small team on a multi-collaborative WCAG-compliant healthcare project. In parallel, I worked in a dynamic, fast-paced team on multiple startup/e-commerce products.

- Typescript
- React.js / Next.js / React Query
- Node.js, GraphQL / GraphQL
- SASS, TailwindCSS

Senior frontend software engineer at *Pragma-IT*

March 2019 - September 2021

Pragma-IT is a US-based healthcare company that provides software for therapists on the go. I led a small frontend team in multiple projects. Architected and developed low-code environment to easily create and maintain complex clinical note forms.

- Typescript
- React.js / Redux

Frontend software engineer at *Freelance*

October 2017 - February 2019

As a freelancer, I worked on multiple small and mid-size projects. I learned how to work and survive in an environment of remote and distributed teams.

- React.js, Redux / Redux saga
- React Native / Expo
- Architected and developed multiple React Native apps that got tens of thousands of users

Frontend software engineer at *REMIT*

August 2016 - September 2017

I created many small web apps from scratch, gained experience of working in a huge enterprise project with multiple teams and products.

- React.js / Redux, React Boilerplate
- Angular

Fullstack software engineer at *RomexSoft*

February 2011 - July 2016

My primary role was to develop new features for the existing projects. I focused on developing soft skills and learning how to work as a tech team with tight deadlines. Learned how to use Git, JIRA for a benefit of the team. Owned multiple features on a high-quality healthcare system.

- SQL / Hibernate
- Java / Spring / REST
- jQuery / Vanilla JS

EDUCATION

London Institute of Leadership and Management

October 2017 - March 2018

Lead-IT Program

Ivan Franko National University of Lviv

September 2006 - June 2011

Master - Applied Mathematics and Informatics

LANGUAGES

ENGLISH Upper-Intermediate

UKRAINIAN Native speaker
